

Premium Education

Advance skills for select users with a tailored learning experience

All learners are different: whether it's their learning style, goals, or level of expertise. For your team members who need deeper Data Intelligence knowledge and skills, Premium Education provides the right training for their goals with a tailored learning experience, plus exclusive access to advanced courses, virtual labs, and unlimited attendance at Collibra's public instructor-led training courses.

The **Premium Education subscription** provides a clear, convenient path for implementation teams, data stewards, engineers, architects, and other future experts to successfully achieve their learning goals faster.

Benefits

Goal-based training

Provide flexibility and convenience with access to the learning content that best suits the individual user and efficiently delivers the knowledge needed at a specific time

Advanced learning

Access exclusive courses and hands-on labs on customization, configuration, and other advanced topics, plus unlimited access to public instructor-led courses

Training cost management

Train the right people at the right time for your most relevant current business needs

Certification paths

Each learner can follow their own certification path at their own pace to prove their knowledge and skills

What are these exclusive courses about?

Premium provides exclusive access to dozens of courses on customization, configuration, troubleshooting, and other advanced topics. For example: SCIM Basic Authentication, Manage Collibra User Identities through Okta with Ease, Using Tableau's Explorer Role to Harvest Technical Lineage, and many, many more.
