Premium Education

Advance skills for select users with flexible and hands-on learning

All learners are different, whether it's their learning style, goals, or level of expertise. Premium Education allows members - and their organizations - to choose the right learning path and experience to obtain the skills they need via self-paced learning or live with an instructor.

The **Premium Education subscription** also provides a clear, convenient path for implementation teams, data stewards, engineers, architects, and other future experts to achieve their learning goals faster and work towards Collibra certification.

What's included?

Instructor-led training

Members have unlimited access to public instructor-led courses. With a global schedule, learners from anywhere can benefit from live, hands-on and interactive sessions. Learn about the benefits of Instructor-led training here.

Virtual labs

With role-based, hands-on exercises and learning resources, Premium Education members can acquire and practice their skills in a safe, shared Collibra training instance.

Certifications

Certification is available to Collibra users who wish to prove their knowledge and skills. We offer certification paths and exams for various Collibra roles, including Solution Architect, Data Quality Steward, and our top certification Collibra Ranger™.

Premium Education members are provided two free exam attempts per certification level.

Learn more about our Collibra Certification program here.

Estimated value

With over 30 training courses to attend, access to Virtual Labs, and two free attempts per proctored certification exam, the estimated value is over $10,000, saving you $6,000 per learner.
