Use of generative AI to generate descriptions for assets

AI feature description	This feature leverages generative AI to suggest descriptions for column, table, database view, and data set assets within the Collibra platform.
Feature optional?	Yes
Model	Model type: Google Vertex AI Gen AI?: Yes Owner: Google
Intended use	This feature is intended to assist users in adding descriptions of assets within the Collibra platform, either individually or in bulk.
Model training/ retraining data	Collibra relies on the training data leveraged by Google Vertex AI as shipped. For more information, please see the Google Vertex AI Product Documentation.
Model input	Asset metadata, including asset names, locations of the assets in the organizational structure, and schema, table, column, and data set types
Model output	Proposed descriptions for a single asset or for multiple assets
Is input data used to train the model for general product improvement purposes?	No
Data storage and retention	All Collibra storage locations are referenced here. Retention is concurrent with customer environment retention.
Human in the loop?	Yes. Descriptions must be approved by the user.
Is personal data processed?	Personal data is not intended to be included in the model input data, but if it is, its processing is subject to the customer's data privacy terms and conditions with Collibra under its Master Cloud Agreement. You can find our standard, customer facing privacy terms here.
Other considerations	None
